How to pack a home — cleanly,
quickly, and for less.

Simple Packing Guide

WHY PACKING WELL MATTERS

The more you pack, the less your move costs.

Move day is billed by the hour. The single biggest variable in how long your move takes is how well your home is packed when we arrive. A well-packed 2-bedroom takes 4 hours. The same home, half-packed, takes 7. That's the difference of hundreds of dollars.

THE FIVE RULES

Get these right, the rest is easy.

- | | | |
|-----------|---|--|
| 01 | Heavy in small. Light in large. | Books in big boxes is the classic mistake — they become unliftable, and the bottom blows out. |
| 02 | Fill every empty inch. | Empty space inside a box is what causes damage. If a box rattles when you shake it, stuff it. |
| 03 | Label the top AND one side. | When stacked, you can't see the top. Use a real marker. Big enough to read across the room. |
| 04 | One room at a time. | Don't pack three rooms at once — everything ends up mixed. Finish, then move on. |
| 05 | Pack a 'first night' box separately. | Bedding, toothbrushes, chargers, basic kitchen, prescriptions, toilet paper. Keep it with you. |

KEEP THESE WITH YOU

Move yourself, in your car.

These don't go on the truck — keep them with you on move day.
